

## Lab 3: Getting Started with Gems.

---

Based on the '*Blog*' application you created in *lab2*, you should extend your blog with **Authentication** and **Authorization** features.

For Authentication, you should use the [Devise gem](#) to implement a Signup/Signin features:

- As a user, I should be able to register in the blog website with username, email, password.
- As a user, I should be able to login to the blog using username or email and my password.

For Authorization, you should use the [cancancan gem](#) to implement:

- Only logged in users can comment on the article.
- Edit and delete articles should be permitted only to the article's author.

---
